Goal ID	SMART Goal	Requirement ID	Requirement Statement	Transaction (Input > Process > Output)	Type	Priority	SRS Reference	SDD Reference	STD Reference	Evidence Status	Validation / Incident / Source Note	Owner
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-101**	The system shall let an Administrator invite, promote, deactivate, reactivate, and delete Administrator accounts, capped at three Administrators.	Admin submits invite/promote → System enforces cap, propose/confirm flow, and audit entry → Administrator account created or changed.	Functional	Must	SRS v6.0 3.2 UC-1.1, pp.21-24	SDD v3.0 3.1.1, pp.14-17	Case-1	**Implemented and verified by Case-1**	VF-05 / RP-05; INC-01 open; UC-1.1; cap via app.admins.max	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-102**	The system shall reserve Admin Owner transfer and Facebook Page change to a single Admin Owner, with an auditable transfer.	Admin Owner requests transfer → System validates and records the change → Authority moves to the new owner.	Functional	Must	SRS v6.0 3.2 UC-1.1, pp.21-24	SDD v3.0 3.1.1, pp.14-17	Case-2	**Implemented and verified**	VF-05 / RP-05; INC-01 open; UC-1.1	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-103**	The system shall let Administrators create, edit, deactivate, reactivate, and delete institutions, and protect the network-default institution.	Admin submits institution action → System applies it, blocking deactivate/delete of the default institution → Institution list updated.	Functional	Must	SRS v6.0 3.2 UC-1.2, pp.25-26	SDD v3.0 3.1.2, pp.18-21	Case-3	**Implemented and verified**	None; UC-1.2; default is "DASIG Central Visayas"	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-104**	The system shall let Administrators and Moderators invite, deactivate, reactivate, and delete institution-scoped Contributor accounts.	Inviter submits email and institution → System issues one-time invite token and email → Contributor activates account.	Functional	Must	SRS v6.0 3.2 UC-1.3, pp.27-29	SDD v3.0 3.1.3, pp.22-24	Case-4	**Implemented; validation refactoring pending**	VF-05 / RP-05; RP-02 and RP-05 planned; UC-1.3; Moderators manage only invitations they sent	Richemmae V. Bigno

G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-105**	The system shall provide network-wide, institutionless Moderator accounts with invite, activation, deactivation, and reactivation controls, and no authority over Administrator governance, institutions, or configuration.	Admin invites Moderator → System creates role-limited account → Moderator accesses queue and calendar only.	Functional	Must	SRS v6.0 3.2 UC-1.10, pp.46-48	SDD v3.0 3.1.10, pp. 47-48	Case-12	**Implemented; validation refactoring pending**	VF-04, VF-05 / RP-04, RP-05; RP-04 and RP-05 planned; UC-1.10	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-106**	The system shall authenticate users with JWT sessions carrying role and institution scope, with persisted revocation and account lockout after failed logins.	User submits credentials → System validates, checks lockout, issues JWT → Role-routed workspace opens.	Functional	Must	SRS v6.0 3.2 UC-1.4, pp.29-31	SDD v3.0 3.1.4, pp.25-28	Case-5	**Implemented and verified with documented behavior**	INC-03 documented; UC-1.4; 8-hour TTL; revocation in DB	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-107**	The system shall isolate institution data so Contributors cannot access other institutions' data.	Request with JWT → Service scoping and PostgreSQL RLS filter by institution → Only permitted rows returned.	Non-functional	Must	SRS v6.0 3.2 UC-1.3, pp.27-29 | SRS v6.0 3.2 UC-1.4, pp.29-31 | SRS v6.0 3.2 UC-3.6, p.75 onward	SDD v3.0 3.1.3, pp.22-24 | SDD v3.0 3.1.4, pp. 25-28 | SDD v3.0 3.3.6, pp.86-88	Case-25	**Implemented; cross-tenant isolation verified by Case-25**	RP-02 and RP-05 planned; INC-03 documented; INC-10 resolved; Needs cross-tenant penetration test during UAT	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-108**	The system shall provide built-in and personal post templates that pre-fill caption structure.	Contributor selects template → System inserts placeholder caption → Editable caption in composer.	Functional	Should	SRS v6.0 3.2 UC-1.5, pp.32-36	SDD v3.0 3.1.5, pp.29-32	Case-6	**Implemented; readiness and guidance refactoring pending**	RP-01 and RP-02 planned; UC-1.5	Mark Anton L. Camoro

G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-109**	The system shall provide a three-step composer (Media → Details → Schedule) with autosave and a 0–100 readiness checklist.	Contributor edits draft → System autosaves and scores readiness → Draft saved with checklist shown.	Functional	Must	SRS v6.0 3.2 UC-1.5, pp.32-36	SDD v3.0 3.1.5, pp.29-32	Case-6	**Implemented baseline; readiness refactor RP-01/RP-02 pending**	VF-01, VF-02 / RP-01, RP-02; RP-01 and RP-02 planned; UC-1.5	Mark Anton L. Camoro
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-110**	The system shall generate one AI caption per request from up to four images in a chosen tone (professional, community, energetic), with an optional instruction of ≤280 characters.	Contributor requests caption → System sends images to Claude (30 s timeout) → One editable caption returned.	Functional	Must	SRS v6.0 3.2 UC-1.6, pp.36-38	SDD v3.0 3.1.6, pp.33-35	Case-8	**Implemented on request; automatic exposure refactor RP-03 pending**	VF-03 / RP-03; RP-03 planned; UC-1.6; 30 requests/hour/user; AI accuracy depends on image quality	Chris Daniel P. Cabataña
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-111**	The system shall provide an advisory AI writing check and a Fancy Text styling panel that never block saving or approval.	User opens tool → System returns suggestions or styled text → User applies or ignores.	Functional	Could	SRS v6.0 3.2 UC-1.6, pp.36-38	SDD v3.0 3.1.6, pp.33-35	Case-8	**Implemented on request; automatic generation pending**	RP-03 planned; UC-1.6	Chris Daniel P. Cabataña
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-112**	The system shall require ≥1 media file (JPEG/PNG/WebP/GIF, MP4/MOV/WebM, ≤50 MB) and an album assignment before submission.	Contributor attaches media → Server validates format, size, count, album → Submission accepted or 422.	Functional	Must	SRS v6.0 3.2 UC-1.7, pp.39-41	SDD v3.0 3.1.7, pp.36-39	Case-9	**Implemented; validation refactoring pending**	VF-01 / RP-01; RP-01 and RP-03 planned; UC-1.7; 25 MB image / 500 MB video split not supported on free tier	Chris Daniel P. Cabataña (lead); Lerah A. Caones

G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-113**	The system shall upload media directly to Cloudflare R2 through backend-issued presigned URLs and serve reads through a backend proxy.	Browser requests upload URL → Backend signs URL; browser PUTs file; metadata saved → Asset stored and readable via proxy.	Non-functional	Must	SRS v6.0 3.2 UC-1.7, pp.39-41 | SRS v6.0 3.2 UC-2.1, pp.49-51	SDD v3.0 3.1.7, pp.36-39 | SDD v3.0 3.2.1, pp. 49-53	Case-13	**Implemented and verified**	RP-01 and RP-03 planned; INC-06 resolved	Chris Daniel P. Cabataña
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-114**	The system shall suggest relevant library assets and a matching album from event context using embeddings and tag overlap.	Contributor enters title/caption/tags → System queries Voyage embeddings with pgvector (0.40 floor, top 8) → Suggestions shown.	Functional	Should	SRS v6.0 3.2 UC-1.7, pp.39-41 | SRS v6.0 3.2 UC-2.2, pp.52-54	SDD v3.0 3.1.7, pp.36-39 | SDD v3.0 3.2.2, pp. 54-58	Case-9; Case-14	**Implemented baseline; image-triggered suggestion refactor RP-03 pending**	VF-03 / RP-03; RP-01 and RP-03 planned; None; UC-1.7; needs ≥10 characters of context	Chris Daniel P. Cabataña (lead); Lerah A. Caones
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-115**	The system shall recommend up to three peak-engagement slots from Facebook Page history, falling back to Tue/Wed/Thu 6 PM when data is sparse.	Contributor opens Schedule step → System analyzes last 100 posts → Ranked slots shown.	Functional	Should	SRS v6.0 3.2 UC-1.8, pp.42-43	SDD v3.0 3.1.8, pp.40-42	Case-10	**Implemented and verified**	None; UC-1.8; panel hidden if Facebook call fails	Richemmae V. Bigno
G1	Increase first-attempt submission completeness to at least 95% through secure multi-institution content authoring and access governance supporting at least two DASIG institutions and the three primary roles by the end of the first development phase.	**REQ-116**	The system shall enforce network-wide scheduling guard rails (±30-minute spacing, ≤6 posts/day, ≥2-hour lead time, 8 AM–8 PM) and reserve slots with a database exclusion constraint.	Contributor selects slot → System validates rules and creates reservation → Slot held or 409 conflict.	Functional	Must	SRS v6.0 3.2 UC-1.8, pp.42-43 | SRS v6.0 3.2 UC-1.9, pp.44-45 | SRS v6.0 3.2 UC-3.1, pp.62-64	SDD v3.0 3.1.8, pp.40-42 | SDD v3.0 3.1.9, pp. 43-46 | SDD v3.0 3.3.1, pp.69-71	Case-10; Case-11; Case-19	**Implemented and verified**	None; RP-01 and RP-04 planned; INC-08 resolved; RP-04 planned; Admin runtime switch; Admin may override hard block	Richemmae V. Bigno
